Insulated Rail Option

# Modern Performance.

Take your home to the next level of sophistication with the Residential Aluminum 360 Series' clean line look. Each handcrafted door is created to your specific wants with multiple wood grain and color options, a wide variety of glass choices from clear to obscure, and optional insulated rails that increase the door's thermal performance. The tongue and groove joint with bulb seal between the sections restrict cold or hot air from infiltrating to the inside of the garage. With all the options available, the sophisticated straight line look of the RA 360 will enhance the elegance of any home increasing curb appeal and the value of your home.

Change any garage from an accessory to a showpiece with a Haas Door RA 360 garage door with a clean, sophisticated look with modern performance. RA 360 opens the door to endless possibilities.

- 3 Anodized Color Options
- 8 Painted Finish Options
- 13 Wood Grain Color Options
- Custom-matched Color and Powder Coating also available

open the door to  
endless possibilities

## RA 360

The variety of options for the RA 360 allows you to select the exact look you desire for your home. Match the door to accent colors on the home, or select a wood grain finish to match your front door. Combine the finish with over 23 glass options from Dark Gray/Dark Gray to our highest privacy glass, Frosted to create a truly unique door that completely enhances the beauty and increases the value of your home.

**For the highest thermal performance rating for our residential aluminum 360,** request the insulated rail option with Solarban 70 and Argon gas for a 1.040 tested U-Factor. These options will help keep the cold out in the winter or cool in during summer.

The tongue and groove joint between sections contain a bulb seal that meets air infiltration requirements to ASTM E283-04. The rails are insulated with polystyrene, and the ends are capped to complete the sophisticated, clean look. These options provide more protection against heat or cold migrating into the garage with the bulb seal that restricts air from flowing into the garage from the outside.
